PROJECTS

Tenzi Game 🔗 | [HTML](#), [CSS](#), [JavaScript](#)

2024

→ Developed an interactive Tenzi game leveraging JavaScript, CSS, and HTML; designed to capture the excitement of players racing to match all ten dice while ensuring seamless user engagement through intuitive gameplay mechanics.

Game Logic: Utilized JavaScript to handle core game mechanics, including rolling dice, locking dice, checking for matches, and determining the winner.

QR Code Generator 🔗 | [HTML](#), [CSS](#), [JavaScript](#)

2024

→ Engineered a responsive QR code generator using JavaScript, enabling users to seamlessly transform text or URLs into high-quality, downloadable QR codes while achieving real-time processing speeds under 2 seconds for instant use.

Logic: Utilized JavaScript to dynamically generate QR codes based on user input, integrate real-time preview, and implement a seamless file download feature using fetch APIs.

Calculator 🔗 | [HTML](#), [CSS](#), [JavaScript](#)

2024

→ Built a JavaScript calculator app for basic arithmetic operations with an intuitive UI for seamless input and calculation.

Logic: Created a JavaScript calculator using `addEventListener` for input, `eval()` for calculations, and `slice()` for operator validation and error handling.

Todo List Application 🔗 | [React.js](#), [Tailwindcss](#)

2024

→ Built a dynamic To-Do List app with React and Tailwind CSS, featuring task management, persistent local storage, and optimized state handling for a seamless user experience.

Logic: Utilized React concepts like state management with `useState`, event handling, and local storage for task persistence, ensuring efficient task addition, deletion, and completion tracking.
